

KETAMINE CLINIC OF PHILADELPHIA CAN HELP.

Ketamine infusion is a fast and effective way to treat patients with depression, certain anxiety disorders, and PTSD symptoms that have failed previous treatment. It can be effective for those suffering from fibromyalgia. Ketamine infusion works quickly, effectively, and with few known side effects.

Please look at our [Frequently Asked Questions](#) for more information.

 info@kcofp.com

Ketamine Infusion can lead to rapid reduction in depressive symptoms within hours unlike traditional treatments, which can take months.

Ketamine can help as many as 80% of patients who have failed multiple other treatments for depression.

Henderson TA, 2016

66

Ketamine saved my life! I'm hanging out with friends again and feel like I have a whole new purpose!

30 year old female

99

Is ketamine safe?

Ketamine infusion for depression has, thus far, been found to be extremely safe and without significant side effects. It is used at doses lower than what are used for anesthesia.

Is ketamine for me?

You may be a candidate for ketamine infusion if you suffer from depressive, certain anxiety disorders, Posttraumatic Stress Disorder (PTSD), or Bipolarmania that has not responded to other treatments.*

How does the whole process work?

We have created an easy-to-follow process document that you are a good fit for ketamine infusion. Please visit [this page](#) for the overview of the process.*

WHO WE ARE:

We are a group of doctors, therapists, and nurses who are so excited to bring such an effective treatment to patients who have been waiting for something to work. We have all had significant experience working in the mental health field so we know how ineffective older treatments can be for some patients. Please click on our personal profiles below to learn a little about each of our backgrounds.
